Summary

Software engineer with 20+ years of experience designing and delivering full-stack solutions across healthcare, telecom, and media. Deep expertise in PHP, JavaScript/React, SQL, and cloud platforms (AWS/GCP), with a track record of system migrations, API development, and scalable applications. A hands-on individual contributor who thrives on creative problem solving and clean code architecture, while mentoring developers to strengthen team performance. Adaptable across legacy and modern stacks, with the versatility to quickly apply new technologies to complex challenges.

Core Skills

Languages:	PHP, JavaScript (React/Node), SQL, Python
Frameworks:	FFF, Yii, Zend, React, Redux, Node.js, Express, Bootstrap, jQuery
Cloud & Infra:	AWS, GCP, Linux, Apache, Bash
Databases:	MySQL, MongoDB
Tools:	Git, NPM, Subversion, SOA

Experience

Roswell Park Comprehensive Cancer Center — Data Conversion Specialist
Remote | Sept 2022 – Sept 2024
- Designed and implemented a PHP/SQL ETL pipeline to transition patient records with full redundancy.
- Refactored appointment module late in project lifecycle while preserving system stability.
- Authored technical documentation and supported incremental launches for smooth handoff to client teams.

SitusAMC — Frontend Developer
Remote | June 2021 – May 2022
- Contributed to platform modernization migration, reducing reliance on legacy tools and improving maintainability.
- Delivered SQL data validation that reduced manual corrections and streamlined QA sign-off.
- Collaborated with release teams across multiple LAMP apps to keep 3-week sprint deliveries stable and on schedule.

Teli Communications — Senior Software Engineer
Centennial, CO | July 2018 – April 2021
- Led design and development of a telecom CRM module, integrating click-to-call and SMS APIs.
- Built campaign registration system and sales dashboards for compliance and revenue tracking.
- Delivered enhancements to customer support and number portability systems, improving reliability.
- Mentored a junior developer to deliver a new ticketing system and expand team output.

Connekt (formerly Delivery Agent) — Senior Software Engineer
Denver, CO | May 2011 – February 2018
- Built a modular Content Management System to streamline campaign creation and reduce launch time.
- Delivered Web Service architecture powering apps deployed on Samsung, LG, Comcast, and Roku devices, enabling large-scale content delivery.
- Unified order management and CMS platforms, consolidating workflows and reducing complexity.
- Integrated third party SDKs (Amazon Pay, Avalara, Zend) to expand e-commerce automation.
- Supported major live event campaigns (e.g., Superbowl) with reliable second-screen experiences.

Education & Training

Drexel University (2004) — B.S. Computer Science
IBM/Coursera (2025) — Certificates in React, Node.js, MongoDB
