SUMMARY

Analytical, creative software engineer with over 20 years of professional experience. Demonstrated ability to learn new languages and codebases quickly, making an immediate impact as a valued team member. Believes in delivering projects complete and on time. Seeking a company that invests in long-term engineering growth -- because technology is a constantly moving target, and knowing how and when to apply the right tool makes all the difference.

WORK EXPERIENCE

Roswell Park Comprehensive Cancer Center | Remote

Data Conversion Specialist | Contract | September 2022 - August 2024

- Designed and developed a PHP/SQL migration pipeline to move Roswell Park's patient records to a new platform.
- Applied a chain of responsibility pattern with full data redundancy across the entire process to improve data tracking through the conversion.
- Encapsulated specific child class changes from base functionality across four conversion files, balancing reusability with proper separation of concerns.
- With six months until launch, absorbed a major eleventh-hour change to appointment file requirements and completed the Appointment class refactor in under a month, enabled by the flexibility of the OO design.
- Developed documentation to ensure a smooth handoff of the codebase to Roswell personnel.
- Lent expertise to full dataset validation during mock and incremental launch phases.

SitusAMC | Remote

Front-end Developer | Contract | June 2021 - May 2022

- Served as a cross-platform teammate responsible for building proficiency in multiple applications to relieve project overflow.
- Migrated front-end JavaScript application pages to a new home-grown application.
- Cross-trained on a full-stack LAMP application (Linux, Apache, MySQL, PHP).
- Designed and implemented client-specified business rules in SQL.
- Collaborated with testers, release managers, and owners on 3-week software release sprints.

Teli Communications LLC | Centennial, CO

Senior Software Engineer | July 2018 - April 2021

Empowered businesses to connect with their customers through a suite of voice and messaging services, delivering tools via both REST APIs and a reseller/customer portal.

- Developed and maintained API and portal environments using HTML, JavaScript, PHP, jQuery, Fat Free Framework, and AWS.
- As team lead, performed research, design, and development of a CRM module for the telecom industry.
- Collaborated with the Romanian team to build a message campaign registration system into Teli's portal using front-end JavaScript.
- Designed and developed a dashboard allowing the sales team to track revenue targets.
- Integrated Teli's callAPI functionality into the CRM as click-to-call and SMS modals.
- Took ownership of Customer Support System and Local Number Portability enhancements using Node.js.
- Developed and maintained procedural automated Bash scripts.
- Mentored a remote junior software engineer in Romania through the development of a new ticket tracking system.

Connekt Inc. (formerly Delivery Agent) | Denver, CO

Senior Software Engineer | May 2011 - February 2018

Built rich media contextual content for TVs and second-screen devices connecting consumers with leading brands. Responsible for design and development across front- and back-end applications on the Advanced Media Team.

- Worked within a team of five to build a new modular application and CMS using Google Cloud Platform (GCP), Python, ReactJS, and Material-UI.
- Led the design and development of comprehensive full-flow event tracking for campaigns using Google Analytics, Rebrandly, and a custom tracking pixel to capture SMS clicks.
- Developed a next-generation REST and web service API platform for iTV and third-party integrations with Samsung, LG, Comcast, Sony, and Roku using PHP on a LAMP stack.
- Built a suite of loosely coupled, highly cohesive modules, services, and libraries to facilitate data transactions within the Delivery Agent engine and third-party APIs in PHP.
- Completed a multi-platform unification project merging Delivery Agent's PHP-based Order Management System with Music Today's CMS.
- Integrated multiple third-party vendor SDKs including Amazon Pay, Avalara, CDyne, Zend, and Doctrine.
- Extended an in-house PHP database object to support query builder functionality.
- Integrated a Facebook management module into the company's home-grown CMS.
- Collaborated on advertising campaigns for live and recorded television events including the Super Bowl and Survivor's 35th anniversary.
- Led and delivered the final stage of a CES 2011 demo in partnership with Intel and Discovery.

DISH Network | Englewood, CO

Senior Analyst/Developer | August 2006 - January 2010

- Developed server-side code in Java 5 to connect with 25 million Set Top Boxes (STBs) across more than 30 different models.
- Led the creation and maintenance of technical and interface documentation for IT and Engineering groups.
- Built the integration between EchoStar STB engineers and Google's data pipeline, decoding Base64 activity log streams per EchoStar's schema using TDD with JUnit and Cobertura at 100% code coverage.
- Successfully migrated multiple legacy applications to a modern environment, relying on the ability to read, understand, and enhance existing codebases.

Ivy Bound | New Britain, CT

Developer / Administrator | Contract | February 2006 - August 2006

- Designed and developed a campaign website for a New York senatorial candidate using HTML, CSS, JavaScript, and PHP.
- Wrote a PHP email form and administered email accounts for campaign staff.

BenefitsXML Inc. | Glastonbury, CT

Services Developer | August 2004 - August 2005

- Developed a front-end demo portal connected to web services benefits software using J2EE, WebLogic, Apache, Jakarta Struts, SQL, and XML.
- Transformed a Java Server Page portal to a Struts-based portal with a focus on expandability through Tiles.
- Extended Struts-based Java classes to fit benefits administration requirements.
- Validated XML messaging from Oracle against SQL at the integrated build level before promotion to QA.
- Enhanced the unit regression test suite for customer-facing user interfaces.

EDUCATION

Drexel University | Philadelphia, PA

Bachelor of Science, Computer Science | Sept 1999 - June 2004

Focused curriculum in Artificial Intelligence & Robotics (LISP, C/C++), Human-Computer Interaction, and Operating Systems

CERTIFICATIONS

IBM / Coursera

JavaScript Programming with React, Node.js & MongoDB | March 2025 - June 2025

- JavaScript Programming Essentials
- Developing Front-End Apps with React
- Developing Back-End Apps with Node.js and Express
- Node.js & MongoDB: Developing Back-End Database Applications

Skills: JavaScript, React, React Redux, Node.js, Express, Ajax, RESTful APIs, UI Components, NoSQL, Full-Stack Web Development
